SUMMARY

Entrepreneurial Full-Stack Developer with experience in Finance, Strategy, and Cryptocurrency. Looking to join a growing, mission-driven startup solving important problems for everyday people.

SOFTWARE DEVELOPMENT EXPERIENCE

Skills & Technologies
HTML, CSS, Sass, JavaScript, TypeScript, React, Node, Express, PostgreSQL, Ruby on Rails, Firebase, Python, Figma, jQuery, PHP (Wordpress)

Selected Projects

pause.app
URL: https://pause-app.netlify.app
- A mobile-first web app to help people organize their thoughts and to-dos around self-care
- Built using React, SCSS, Node, and MongoDB alongside 3 teammates as part of General Assembly bootcamp; chosen by teammates as tech lead, responsible for project management and code review
- Designed and built user authentication model as well as majority of frontend logic and API requests

CoinRef
URL: https://coinref.netlify.app
- Site to help crypto novices find summaries, price data, and research on various cryptocurrencies
- Built with React, D3.js, SCSS, and the Messari OnChainFX API

Pruve (contract work)
URL: https://pruve.org
- Built and integrated a like/dislike plugin for user reviews using jQuery, PHP, and MySQL
- Collaborated with client's tech lead on front-end and server code for updating and deleting reviews
- Pruve has had a 150%+ increase in user-generated content weekly since integrating plugin

BUSINESS EXPERIENCE

Fidelity Investments, Boston, MA   July 2018 - January 2020
Senior Analyst, Strategy & Consulting group

- Led market and competitive analysis as part of business cases for 2 internal startups, resulting in $2.5M+ of pilot funding
- Built and presented market sizing and financial models as part of startup pitch to CEO
- Created mockups and performed design strategy interviews with 20+ target users for both startups
- Crafted PowerPoint decks for bi-weekly blockchain steering committee comprised of 12 top executives, including CEO, CFO, and Head of Digital Assets
- Analyzed data of ~4M customers using SQL and Excel, leading to recommendation of new customer segments to heads of Personal Investing, and Wealth Management businesses

EDUCATION

General Assembly, Software Engineering Immersive   August - December 2020

Completing 500+ hours of coursework and 5 projects to learn how to write better code in an Agile team
Core Curriculum: Scss, JavaScript, React, Node, Express, MongoDB, PostgreSQL, Ruby on Rails, GitHub

Babson College, Babson Park, MA   May 2018

Bachelor of Science in Business Management, Concentration in Strategic Management
